"Certain Basic American Rights"

By RAYMOND PITCAIRN
National Chairman Sentinels of the Republic

In one of the most inspiring discussions that marked the writing of our Constitution, James Madison identified the people as "the fountain of all power," and insisted that by resorting to them all difficulties would be solved.

How true the statement was, subsequent history has proved. **In virtually every serious national difficulty, it has been the voice of the average citizen, rather than of the partisan politician, that spoke the constructive answer.** And within recent weeks America has seen another demonstration of this great verity.

At the National Convention of the American Legion, many resolutions were heard and adopted. **But the one to strike a responsive chord in the heart of every American was that which re-affirmed "our belief in, our adherence to, and our resolve to defend, certain basic American rights and institutions . . ."**

They included personal liberty, religious freedom, home and family and "constitutional guaranty to safeguard these precious rights."

This was not the voice of political partisanship—for the American Legion includes members of all parties. It was not the voice of any economic faction—for the Legion includes employers and employees, professional men and artisans; every strata of our great productive body of workers.

It was, instead, the pronouncement of the composite American, voiced by men who had demonstrated their faith in the American ideal of democracy and were willing to demonstrate it again.

It was an expression of that spirit which the Founders invoked and foresaw when they made this a government of, by, and for the people, and knew they had placed it in firm and capable hands.

Military Burial Given Frank Love Tuesday

Frank Love, former Chief of Police of Menlo Park was buried with full military honors at the Presido, San Francisco, National Cemetery last Tuesday afternoon.

Mr. Love, who was born in Chicago, Illincis, 46 years ago, had lived in Menlo Park for many year, where he had made a host of friends who will miss him greatly as the years go by.

Mr. Love passed away unexpectedly and suddenly following a heart attack last Sunday night at his home on Middle avenue in this city.

He was a veteran of the World War and for several years erved as Chief of the Menlo Park Police Department where he made many friends through his strict attention to duty and the efficiency that he brought to the department. After leaving the Police Department he followed the carpenter's trade until his death Sunday.

He leaves to mourn his loss, his widow, Mrs. Myrtle Love, three daughters, Vivian, Dorothy, and Lorraine all of Menlo Park; and one sister, Mrs. Bert Herring of Palo Alto.

Funeral services were held from the Tinney Funeral Home in Palo Alto Tuesday morning, the Rev. W. L. Staub of the Menlo Park Presbyterian Church reading the service.

Mr. Max Lund of Salt Lake City will occupy the Nielsen cottage on Portola Road while attending Stanford University.

Mr. and Mrs. Bertoni have arrived from their wedding rtip and are at home to their friends in the Gleason apartment, 870 Santa Cruz avenue.

Hit-Run Driver In Local Accident

A man, tentatively identified as James Johnston is in the Communit hospital at Beresford, painfully injured Wednesday night by a hit-run driver who struck him down on El Camino Real at Middle avenue and then drove away leaving the victim in a huddled heap on the side of the road.

The accident was reported to Police Officer Frank Roach at 1:45 yesterday morning by Chris R. Redlich, a Stanford student from Burlingame. Redlich reported that he saw the man's body at the road side as he drove by and stopped to investigate.

Local police have little or no clues to work on as a careful search failed to reveal either broken glass or skid marks on the highway. at the scene of the accident.

Johnston, who was identified from letters in his pockets, was rushed to the Palo Alto hospital for treatment but was later removed to the Community hospital at Beresford. He suffered a leg fracture, deep cut over his eye, and numerous severe cuts and bruises on his head.

GOVERNMENT PLANS AID FOR FISHERIES

Important Industry at Last to Get Attention.

Washington.—The vast Atlantic coastal fishing industry, worth hundreds of millions of dollars, at last is to get a share of the federal government's protective attention.

Commerce and State department officials, it was learned recently, are making plans to negotiate important fish treaties with Canada, Mexico and several additional Latin-American countries, for the protection of the existing schools of migratory fish in the Atlantic.

On the basis of this treaty it was learned, congress probably will be asked to enact some migratory fish control legislation for interstate as well as international application.

Proponents of the treaty pointed out that constitutional limitations made it impossible for congress to enact any migratory bird legislation until the bird treaty with Canada was negotiated and ratified, but a Supreme court ruling held that this treaty made it incumbent upon congress to pass legislation to effect the treaty.

The same system is being followed in the case of migratory fish.

Most important among the migratory fish, from a commercial as well as sporting point of view, are the striped bass and the bluefish.

The latter are particularly important, in that they spend most of their existence either moving from north to south along the coastal banks or vice versa.

While some states have highly protective legislation, others have little or none.

Dove Tree Is Found in Three-Year Hunt

Honolulu.—The first "dove" tree ever seen here has arrived via Pan-American Clipper from China. While the tree figured prominently in ancient Chinese literature, it required a three-year search to find the present specimen in the Yangtze valley. It has been planted on the island of Kanuai. Blossoms are similar in shape and color to a dove.

FOR RENT—Furnished 2 room and bath apartment and garage. Reasonable. Beautiful yard and good neighborhood. Phone P. A. 21467.

Fire Prevention Week Program Scheduled For This Evening

An exceptionally fine program has been arranged for this afternoon and evening by members of the local fire department in celebration of Fire Prevention Week. The program will be carried out by the Peninsula Fire Chief's Club here be ginning at 1:30 p. m. at the local fire house. The program follows:

1:30 p. m. Display of antique and modern Fire Apparatus, pictures and displays of all Fire Departments on the Peninsula. Fire prevention displays.

7:00 p. m. Inspection of displays.

7:30 p. m. Introductions.

7:40 p. m. "Why this Demonstration," by Chief Hugh Morris, San Mateo, President Peninsula Fire Chief's Club.

7:50 p. m. "Response and Demonstration of Rural Fire Apparatus", by San Mateo County Fire Wadren.

8:10 p. m. Demonstration of Life Lines and Pompier Ladders, by Menlo Park Fire District.

8:30 p. m. Demonstration of Salvage Work, by Belmont Fire Department.

8:45 p. m. Major disaster call, Mobile Radio Transmitter of the U. S. Naval Reserve, will make a call to all Fire Departments in this community, and response will be made by Palo Alto, Stanford University, Redwood City, San Mateo County Fire Warden and Menlo Park.

8:50 p. m. Ladder anr Hose Demonstration by Redwood City Fire Department.

Presentation of American Flag to Miss Lucile Dossola, essay contest winner.

George Murray, Battalion Chief, San Francisco Fire Department will be master of ceremonies.

Saturday night (tomorrow) the Matt Harris Club of the Menlo Park Fire District will sponor a Firemen's Dance at the Blue Moon Ball Room in this city, Art Weidner's Orchestra furnishing the music.

The following essa y written by Miss Lucile Dossola of Central School, Menlo Park, won the pennant this year, the judges being the Principals of the schools and Chairman James B. Howell of the Menlo Park Fire District. The contest was participated in by the pupils of the sixth to eighth grades of 7 surrounding schools.

Prize Winning Essay

One way I would prevent Fires, essay contest won by Lucile Dossola of Santa Cruz avenue, Menlo Park and student of low eighth grade Central School, aged 13 years.

"Most people now a days have automatic water heaters. We have one of the old style, they are the most dangerous kind.

"I'll tell you of an experience I had. I was Sunday. My father had to go to work. He told my mother to light the heater for noon so he could take a bath.

"My mother was so busy that she forgot about lighting the hearter, when my father came home my mother remembered she hadn't lighted the heater. While my father and mother were discussing the matter I ran down to the basement where the heater was, I lighter a match and was just about to light the heater when it exploded. I was burned very badly.

"I am going to prevent fires by seeing that our heater is inspected at least once a year. I am going to tell other children about my experience too."

Last year the prize winning essay came from the Garfield school.

During the week talks have been given at various schools and clubs, and demonstrations of aparatus were give nat the schools by members of the fire department.

Sequoia P.T.A Board Holds Meeting

The executive board of the Sequoia Parent Teacher Association met at the high school Tuesday morning at 10 o'clock, with Mrs. B. E. Myers presiding. Mrs. J. E. Morrich, chairman of the program committee, announced that the next meeting on October 12 would be a panel discussion of the new system of councilling for students at Sequoia high school, Miss Juliane Wolters will be chairman of the dis cussion. Mr. Harvey Hall will give a talk on the system, and Miss Angelina Burns, Mrs. John D. Peck, Mrs. John J. Garland, and Mr. A. C. Argo will lead in the ensuing discussion.

December 10 has been set as the date for the annual sports night, and Mrs. Ted Andrews of Menlo Park is in charge of this event. Mrs. A. S. Kalenborn, chairman of the membership committee, reported that lists are being made and subcommittees formed for a membership drive to take place during October and the first half of November. Mrs. J. M. Ealing, finance chair man, presented the annual budget for discussion. It was decided that the P. T. A. executive board go on record as recommending immediate action in the matter of selecting some worthy object for the John Gill Memorial fund.

Mrs. P. D. Surber announced that the parental education committee is arrafingin g for a study course to be given this fall. Details will be presented at the regular P. T. A. meeting next Tuesday afternoon.

Average American Pays $2.50 a Week for Food

Washington.—The average American family spends about $2.50 a week a person for food, according to a survey by the bureau of home economics of the Department of Agriculture. The weekly food bill ranged from 65 cents to $7 a person last year among 20,000 families surveyed in all parts of the United States, the bureau reported.

New England families tend to spend more money for food than families in other regions, the survey showed. Southeastern families, largely because of the number of negroes, spend the least. Pacific coast food budgets are more likely to provide adequate diets than in other regions of the country, largely because of lower food costs, the bureau said.

Three-fourths of the small city and village families in New England spent less than $3.65 per capita weekly for food during 1936, the survey showed. The bulk of this group spent between $2.30 and $3.65 a week. In contrast with New England, negro families in the small cities and villages of the Southeast spend the least for food of any group covered by the study.

Book Out 20 Years

Syracuse, N. Y.—Three unlisted books were found on the shelves of a branch library here. Investigation disclosed that the books had been borrowed 20 years ago from the Syracuse public library.

Dr. Forsythe Opens Dental Office Here

Dr. Max W. Forsythe, is inviting the residents of Menlo Park and vicinity to visit his new Dental offices in the Artino Building, on the high way in this city tomorrow, when he is holding an informal open-house in order to get acquainted with local residents and also that the public may inspect his offices and the equipment that he has installed.

The offices and entire upper floor of the Artino building has been taken by the young man and has been repainted and finished and everything possible done to make the office and reception room as comfortable as possible for those who will use them.

In speaking of equipment it is imposible to find anything that will be classed as better. Dr. Forsythe has installed a new model "shockless"X-Ray machine and in addition to being the latest to be had it will give local patrons of the doctor the last word in service. There is also a sterilizer of the latest and most approved design to keep the instruments in a sanitary condition, an air compressor to furnish plenty of pure fresh air for the work when needed, a new late model dentist chair, and cabinets of new, high class instruments.

Dr. Forsythe has fiitted up one room for a laboratory, where he will do all of his work. He is an expert dental surgeon and will make his own plates in this city and thus be in a position to turn out only the highest type of work, owing to the fact that he will prepare both the plates to fit the mouth and prepare the mouth to receive the plates, thus asuring satisfaction.

Dr. Forsythe was a member of the graduating class of 1937, at the University of California and ranked as one of the best students in that institution. He is a young man of very pleasing personality, who thoroughly understands dentistry in all of its branches and Menlo Park welcomes him to its business and professional family, and wishes him the success that he deserves.

Dr. Forsythe is now an instructor at the University of California Dental College, where he will be part of the time. He expects of start his practice in Menlo Park on Wednesday.

The Mothers Club of St. Joseph's School will houl its monthly card party in the Parish Hall, Menlo Park, on Thursday afternoon, October 21, 1937 at 1:30. Hostesses for the occasion are Mrs. Thomas Murray, Mrs. Ray Tinney and Mrs. George Murphy.

Mrs. C. A. Devol is giving a card party at her home, "Missoula" on Santa Cruz avenue and Lemon avenue tomorrow evening at 8:15. Score cards and refreshments will be 25 cents and the proceeds will go to the Veterans of Foreign Wars Auxiliary.

Mr. and Mrs. V. S. Forsythe of Williams California, were visitors in Menlo Park yesterday, stopping in at the Recorder office. Their son Dr. M. W. Forsythe is opening his dental office here tomorrow.

According to reports from the County Department of Pubdic Health there is one new case of Chicken Pox in Menlo Park.

Mr. and Mrs. Norman Davis have rented the cottage at 626 Cambridge road.

Fishing Information By Expert Bill Cook

Fishing continues good on the rivers, sloughs, bays and local ocean waters. Tons of albicore have been caught out of Santa Cruz and Monterey. Large sardine boats have been catching capacity loads off the coast of Half Moon Bay, and the multitude of sportswomen and men have been catching limits of nice striped bass in the up river sloughs and bays.

Babe Arzino the big bait dealer who operates the largest fish market in San Jose was up on San Pablo Bay Sunday on Cook's boat "Western Cal No. 5", together with Vincent Quarteho and party and each person took a limit of bass from eight to fifteen pounds. All of the stripers were taken on fresh sardine bait.

Here is a story for Mr. Ripley—Last Saturday morning at 1 o'clock an Italian fisherman fishing alone left Monterey for the albicore grounds about 25 miles out. At daylight a southwester started blowing so he started for port. To keep the spray out of the forward hold he attempted to fasten down a hatch cove and slipped and went overboard with the cover. With throttle open the boat soon disappeared and what a place to be—out of sight of land and a rough sea running—after floating two hours another fisherman, also homeward bound, happened to pass close by se he heard this lonesome fisherman, hauled him aboard and outside of being well chilled he was otherwise O. K. No trace has been found of the boat and the supply of gas he had aboard must have carried the lonely boat well towards China.

Sunday was another fine day at Half Moon Bay an devery angler brought in considerable fish. A few smelt are being netted on the beach near Half Moon Bay and also on the beaches near Santa Cruz.

Captain Jack Sieberg caught a nine pound silver salmon on bait at Half Moon Bay Monday. He and first mate Butler caught about 100 pounds of rock bass and blue cod.

Anyone desiring to go deep sea fishing should try to do so during the next four weeks as this month will see the end of smooth sea and ideal fishing conditions. November and December will be the months to angle for the large stripers who are slowly moving up the bays, the sloughs and rivers.

Mr. and Mrs. D. A. Orr who for several years lived at 14 Hobart avenue have moved to 1065 Valparaiso avenue.

"WASP" PLANES FOR ARMY WIN APPROVAL

Success of Craft in Spain Convinces Officials.

San Diego, Calif.—Spain is a fiery laboratory in which modern military tactics—especially as regards aircraft—are being tested.

Army air corps officers stationed here have revealed that one of the first lessons learned from the Spanish revolution is the extreme value of pursuit planes.

"In the United States many strategists have been inclined for the last few years to discount the value of the pursuit type of fighting plane," one officer of the One Hundred Fifty-fourth observation squadron, who refused to permit his name to be used, told the United Press. "But the pursuit planes definitely have come into their own in Spain."

Reports on Air Strategy.

Officers stationed here said for months the War department has been compiling confidential reports evaluating certain types of strategy used by both insurgents and loyalists.

Among the findings based on those reports were said to be several of a startling nature insofar as aircraft is concerned.

It was said the Spanish war also has given military officials a chance to observe the performance of fighting aircraft designed and built by the great powers of the world, and to compare the efficiency of design, armament and speed with similar American craft.

The tiny, darting pursuit planes have demonstrated, in the Spanish civil war, time and time again, it was said, their ability to overcome the heavier, but potent bombing craft.

Carrying small sized bombs and machine guns the little ships are able to perform deceptive maneuvers around the more cumbersome "flying fortresses" and evade the heavier armament while disabling the larger craft with sprays of machine-gun fire and the small bombs.

Then, too, it was pointed out, the pursuit planes are particularly valuable in harassing concentrations of troops on the ground by demoralizing them with machine-gun fire.

Army Orders Fast Ships.

Army officers here said the lessons of the Spanish war already are being put to use in this country, with the army having placed orders for what were described here as the "fastest pursuit planes in the world."

Eighty-five of these little fighters already are under construction at the Seversky Aircraft corporation in the East, it was said.

Then, too, the army, according to officers here, has developed what is known in military circles as the XFM-1. This plane, the officers say, is capable of "overhauling any air target thus far constructed."

This new XFM-1 carries a crew of five men. Is operated by pusher rather than tractor propellors—a decided innovation in modern fighting planes. This plane, the top speed of which is a secret, is capable of fighting at an altitude of 30,000 feet or more. At least five, and possibly more, heavy-caliber machine-guns are mounted on this craft, it is said.

Can you afford to be NERVOUS?

Perhaps you could afford those attacks of Nerves if you were the only one affected. Tense nerves make you a nuisance to everyone with whom you come in contact. No one likes you when you are jumpy, irritable and nervous.

DR. MILES' NERVINE

DR. MILES NERVINE has been recognized as effective for more than 60 years by sufferers from **Sleeplessness, Nervous Irritability, Nervous Headache, Nervous Indigestion, Travel Sickness.**

DR. MILES NERVINE is now available in the original liquid form and effervescent tablet form. You can get it at any drug store in 25 cent and $1.00 packages.

Humming Bird Halts Tunnel Construction

Los Angeles.—The little Dutch boy who saved Holland from sea inundation by sticking his finger in a leak in the dike has been matched here by a humming bird which has delayed the construction of an essential tunnel in the new metropolitan water district project.

The humming bird built its nest on the knot of a guy rope used in the tunnel construction and started in to raise a family of hummers. Work was ordered delayed on that part of the project until mother humming bird had hatched her brood.

Cemetery Rich in Minerals

Joplin, Mo.—The Oronogo Cemetery association has decided to permit a mining company to continue digging for lead and zinc on its grounds. Mining engineers said that the cemetery was underlaid with a rich vein of ore.

Mr. and Mrs. Joe. Bennedetti of Los Altos are moving to Menlo Park tomorrow and have rented the Fracchia house on Santa Cruz avenue.

War in Spain Opening New Industry in Africa

Johannesburg.—Civil war in Spain may bring into existence another important industry in South Africa, if certain negotiations being handled by the union department of mines are successful.

Hematite ore, for which northern Spain has hitherto been the principal source, soon will be going forward to overseas blast furnaces, which are unable to obtain adequate supplies owing to the present blockade of Bilbao and other export centers.

Since hostilities began between the insurgents and the Spanish government, British and Continental ironmasters have been searching for new sources of supplies. The geological survey at Pretoria located vast fields of similar hematite in the Union. More than one-quarter of the imports into the United Kingdom for 1935, the last available year, was derived from Spain, namely, 1,128,949 tons out of 4,547,436 tons.

Past Presidents N.D.G.W. To Entertain State Pres-

On Friday evening, October 15, the Past President's Association, of the Native Daughters of the Golden West of San Mateo County, will entertain the State Association President, Mrs. Edna Sampson, of Grass Valley.

The meeting will be held in the Central School in Menlo Park and State Director Frances E. Maloney of this city has charge of the arrangement, and is being assisted in the work by Mrs. Annie Doyle and Mrs. Elizabeth Gould.

MENLO XMAS PARTY RUMORS

Rumors are still going round the streets to the affect that Menlo Park will celebrate Christmas this year with a decorated city, a big open house evening by the merchants, and a general good time. ItI is time that something along this line was being done, and many are the express hopes that it is true.

Religious Bees Keep Members in Church

North Manchester, Ind.—Ears of the Methodist church congregation here were left buzzing as the result of the antics of a swarm of religious bees that crowded around the church entrance and threatened to disrupt services.

Paul Hathaway, town marshal, freed the imprisoned parishioners by spraying the bees with gasoline and setting fire to the swarm.

Expedition Fails to Find Seal Breeding Grounds

San Diego, Calif.—The age-old mystery of the location of the breeding grounds of the female elephant seal today still is as much of an enigma as the fabled "graveyard of the elephants."

A thorough search of the Guadalupe and Sedros islands, off the coast of Mexico, by an expedition in charge of Capt. G. Allan Hancock, millionaire patron of the sciences, and a group of San Diego zoo officials, failed to reveal a trace of the long-sought breeding ground.

Sequoia Union High School Activities Interestingly Told

NEW STUDENT MONITOR SYSTEM ESTABLISHED

In order to prevent noise and commotion during the fourth and fifth lunch periods, a new monitor system has been established at Sequoia Union high school, according to Mr. Donald Bogle, dean of boys.

Two girls are to be stationed just inside the main door, one for each period. In order to go to lockers or any class rooms the student must first secure a pass from the monitor. When the student has finished his business in the building, he must return his pass to the monitor, and leave the building at onve.

"An attempt is being made to extend the system throughout all the periods," said Miss Ann Burns, the school librarian, who is in charge of the system.

MAX GELBER IS IN STANFORD-LANE HOSPITAL

Mr. Max Gelber, band and orchestra director of Sequoia Union high school, is in Stanford Lane hospital this week suffering from an eye trouble with which he was suddenly stricken on Friday, October first. It is expected he will be there approximately three weeks.

The trouble is said to be similar to that which affected Frank Alustiza of last year's Stanford football team.

Mr. Otis Carrington took charge of the band at Friday's game, but now Mr. Vernon Wallace, graduate of San Jose State College will have charge of Mr. Gelber's work until his return.

SAN JOSE FOOTBALL TEAM HERE THIS AFTERNOON

The San Jose high school football team will meet Sequoia high school on Sequoia's turf this afternoon, marking the second week of league competition in the Peninsula Athletic League.

Both teams are seeking their first victory in the P. A. L. Sequoia having tied San Mateo in its first attempt and San Jose drawing a bye. Student body cards admit students free of charge.

CONSTRUCTION WORK ON SCHOOL NOT COMPLETED

Construction work carried on by W. P. A. workers at Sequoia has not been completed yet, according to Mr. Donald Bogie, dean of boys.

The most important jjob to be completed as yet is the painting of the school aduitorium. Nearly every thing in the aduitorium received a general going over except the ceiling, which neede none because of a special plastering job done two years ago.

Other painting achievements recently completed include the lobby in the boys' gym and the painting of Principle A. C. Argo's office.

BOYS GROUP MEET TO DISCUSS SCHOOL WELFARE

A group of fourteen boys selected by Mr. Donald Bogie, dean of boys, meet during varius luoch hours and discuss problems dealing with the general welfare of the school. Thus the students views are obtained on such topics as how to improve the games and rallies.

Presiding over these meetings are Mr. Bogie and Mr. Frank Griffin, head of the boys' gym department.

OCTOBER ENROLLMENT BESTS LAST YEAR AT THIS TIME

On October 1 enrollment at Sequoia Union high school reached a total of 1454, 30 more than last year at this time, according to the records in the attendance office.

The daily attendance has also increased over last year's number by 33. The boys, thus far, with a total of 783 have more enrolled than the girls who have 671 on the enrollment list.

Christian Science Services

First Church of Christ, Scientist. Bryant street and Forest avenue, Palo Alto. Sunday services at 11 a. m.

Wednesday evening meeting at 8 o'clock.

"Are Sin, Disease, and Death Real?" will be the subject of the Lesson-Sermon Sunday, October 10, in all Churches of Christ, Scientist, branches of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass.

The Golden Text will be: "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death" (Rom. 8.2). Other Bible citations will include: "For ye were sometimes darkness, but now are ye light in the Lord: walk as children of light: . . . Proving what is acceptable unto the Lord. And have no fellowship with the unfruitful works of darkness, but rather reprove them. . . Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give thee light" (Fph. 5: 8, 10, 11, 14).

The Lesson-Sermon will also include the following pasages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "All reality is in God and His creation, Harmonious and eternal. . . . Therefore the only reality of sin, sickness, or death is the awful fact that unrealities seem real to human, erring belief, until God strips off their disguise. They are not true, because they are not of God" (p. 472).

Map 50 Years of Ocean Weather to Guide Planes

New Orleans.—Use of weather observations made by ship captains during the last half century to determine the safest air lanes for regular trans-oceanic flights is foreseen by W. F. McDonald, chief of the United States weather bureau here.

Composite maps showing the weather tendencies at any point in the seven seas would be used by pilots to chart their routes, McDonald said.

From nearly 6,000,000 observations turned in to the weather bureau at Washington, he has worked out charts, maps and other data to show the general weather tendencies all over the world.

Presbyterian Church Services For Week

Sunday school at 9:45 a. m. in charge of Superintendent John H. Heltzel.

Morning worship at 11 o'clock at which time the pastor, Rev. W. L. Staub, will the subject an "Odd Distinction." The music for this service will include "Fade, Fade Each Earthly Joy," by the choir and "Beautiful Isle" by Julia Ray.

Christian Endeavor will convene at 6:30 in the evening, and all of the young people are invited to be in attendance.

At the evening service at 7:30 the pastor will speak on "Evangelism." The choir will sing "Come Unto Me."

On Thursday afternoon at 2 o'clock the Ladies Missionary Society will hold its fall rally. Rev. Caldwell Smith from India will be the speaker of the day and the public is invited to attend.

The October Committee of the Auxiliary will hold a food sale on Saturday, October 16 in the morning at the Bearse Drug Store with Mrs. Bearce as the chairman.

Wooden Salt Mortar Is Prize Relic of Druggist

Eaton Rapids, Mich. — A prized relic from old England now belonging to Harry G. Heaton, Eaton Rapids druggist, is a wooden salt mortar more than 300 years old. It was made by a Heaton ancestor in 1616 and, with documents explaining its history, handed down from father to son. Although the papers have been lost, the story is remembered by Mr. Heaton's father, Henry G. Heaton, of Carson City, Mich.

In 1616 a hard maple tree on John Heaton's homestead in England blew down during a storm. From the wood of this tree he made utensils of all sorts, including the mortar and pestle which he considered his masterpiece. It stands eight and one-half inches high, with a base four and one-half inches in diameter, and it measures five and one-half inches in diameter at its largest circumference.

No stain or other finish was ever put on the wood, Mr. Heaton says, but age and use have so polished and darkened it that it looks like finished walnut.

Potatoes Not Fattening, Expert on Food Asserts

Ames, Iowa.—Contrary to popular belief, a few potatoes more or less in the daily diet will have no effect on the waistline, according to Miss Ruth Cessna, nutritionist at Iowa State college.

About 80 per cent of a potato is just plain water, she said, and consequently not very fattening.

From a calory standpoint, a medium sized potato rates equally with a baking powder biscuit, a tablespoon and one-half of French dressing, or even a good sized apple or orange.

Mr. and Mrs. J. Dinew ho, for the past several months have been in Chicago, arrived in Menlo Park on Wednesday and have taken the Matteson home at 650 Menlo avenue for the season.

The American Legion Auxiliary will hold its regular business meeting in the Legion Hall on Oak Grove avenue Tuesday evening, October 12.

Mr. and Mrs. Harold Emery have rented the Hayden cottage on Polhemus avenue.

Mr. and Mrs. W. E. Schuck are renting the Diana Hogevel cottage on Alameda de las Pulgas.
